Description

Aluminum Skirted

For those who need a bit more storage than our standard aluminum flatbed, our AT skirted aluminum truck bed is built for you. The AT model adds four toolboxes with a 12 Gauge aluminum side skirting to the flat bed model, allowing for greater utility while maintaining the lightweight build you would expect of an aluminum truck bed. The extruded aluminum deck built on the solid steel subframe ensures this bed has the strength to work for you. A recessed 2 5/16" 30,000 Lbs. gooseneck ball hitch rating and a tongue weight of 6,000 Lbs. allows you to comfortably haul heavier loads while the 2" rear receiver hitch rated at 14,500 Lbs. trailer weight and 1,400 Lbs. tongue weight for any every day hauling you need. To add to that, the bed comes with a standard 7-way plug installed in the recessed gooseneck hitch and a 7 way plug in the rear hitch with a 4 way adapter built in. For greater customization, you can add the optional 6" aluminum removable side rails, or chrome and clear LED light options creating the perfect look for your truck.
