### Description

Cisco is a 10 yr old Chincoteague pony that was rounded up in 2011. A friend of ours purchased him at that auction and had him until she gave him to us. We have acquired several horses over the years and just don't give the ponies enough attention to justify keeping them.

Cisco is green broke and started for dressage type training, but has the potential to go in any direction. He ground drives, lunges, walk-trot-canter, leg yields, serpentines, and circles. He is a very flashy mover and I think he could excel as a hunter/jumper pony or even in the barrel ring. I think he could really go in any direction, just needs someone to actually love him and ride him! He easily carried my 170 lb husband so could easily handle an adult rider. He had been ridden by amateurs but we don't have any kids to test him with. He probably had around 3-5 months of professional training in him over the last 2-3 years. I would recommend a really good kid or an adult rider due to him being green and he has a lot of go if you ask for it. We recently ran him through a jump shoot and he easily jumped 2' 9" so I think he could definitely go that route!

He is very friendly in the pasture and easy to catch. He has lived both in stalls and in pasture only. He does crib in a stall and sometimes on metal gates if all the horses are crowding the gate. He loads and rides in a trailer great. He is great for vet and farrier. He goes barefoot. He had his last shots this fall so is good to go!
